**APRIL 22, 2025**

## **FORVIA PARTNERS WITH RIGHTWARE TO DISTRIBUTE ADVANCED SOFTWARE TO NEW MARKETS**

FORVIA, a global automotive technology supplier, collaborates with Rightware, the pioneering provider of automotive graphics software tools and services, to deploy FORVIA's software into Rightware's Kanzi Studio ecosystem and HMI toolkit.

Through this, FORVIA will explore new markets within Rightware's portfolio of clients, who will gain immediate access to FORVIA's Smart Dimming and MyVue software designed to enhance the perceived image quality of vehicle's electronic displays while reducing power consumption.

Together, FORVIA and Rightware aim to revolutionize display user experience, by making award-winning patented perceptual display technologies available in the best HMI production toolchain on the market. These and more innovations will be showcased at FORVIA and Rightware booths during Auto Shanghai in April.

*"This partnership marks a great milestone for FORVIA's Software-Only product introduction to the market in collaboration with Rightware. We join forces to provide the best-in-class HMI Software products that are 1- context-aware, 2- broadly applicable on different SoCs, 3-easy to Integrate and upgrade and 4-personalized for drivers and passengers.", said Jean Lorchat, Software as a Product (SaaP) Director at FORVIA.*

Over the next two years, FORVIA's software will reach new users via Rightware's Kanzi One, an HMI toolchain that enables automakers to accelerate the design and development of new user interfaces with superior visuals and optimized performance. Advanced graphics and specialization for the automotive market make it the tool of choice for innovative immersive cockpit designs that run efficiently on the selected hardware. The integration of Smart Dimming and MyVue in Kanzi One is quick and simple, immediately enabling you to access the power of the solution in your HMI designs.

*"The availability of Smart Dimming and MyVue features for Kanzi One matches our mission to offer the best possible in-car experience for drivers," said Tero Koivu, Co-Chief Executive Officer at Rightware. "We look forward to our customers taking advantage of this latest perceptual display technology when creating their automotive HMIs with Kanzi One."*

Automakers will be capable of empowering their vehicles with a safer, more comfortable, and personalized electronic display and interface that adapts to ambient lighting and user's profile.

## **FORVIA's UX software: Smart Dimming and MyVue**

FORVIA's software optimizes display readability by considering key influences of display perception: ambient lighting, panel technology, user's visual system and content. The algorithms ensure high quality perceived image on all display devices for all age groups. Smart dimming, PACE award winning solution, enhances readability in bright and dark conditions, reduces power consumption and enables manufacturers to improve their competitive edge by reducing the cost of design, bill of materials and warranty. Already integrated by major carmakers, it improves driver safety and comfort. MyVue enables users to adapt and enhance image perception based on age and gender, compensating for the yellowing of the cornea and reduced contrast sensitivity.

### **About Rightware**

Rightware is the pioneering provider of automotive graphics software tools and services. We are uniquely positioned with foundations in gaming, graphics, and UI development, and are laser-focused on the automotive industry. Kanzi One, our all-on-one HMI toolchain, enables automotive OEMs to deliver the best user experience for their customers while transforming the traditional HMI into a real Signature UI. We support this mission with a worldwide design and services organization boasting an unmatched track record of successful production projects. Headquartered in Finland, we have a presence in China, France, Germany, Italy, Japan, South Korea, and USA. As a ThunderSoft company, our combined skills and assets allow us to deliver fully integrated HMI solutions, engineering support, and design services anywhere in the world. Kanzi One is the market-leading automotive UI tool, trusted by over 50 automotive brands around the globe. [www.rightware.com](http://www.rightware.com)

### **About FORVIA**

FORVIA, a global automotive technology supplier, comprises the complementary technology and industrial strengths of Faurecia and HELLA. With over 150,000 people, including more than 15,000 R&D engineers across 40+ countries, FORVIA provides a unique and comprehensive approach to the automotive challenges of today and tomorrow. Composed of 6 business groups and a strong IP portfolio of over 13,000 patents, FORVIA is focused on becoming the preferred innovation and integration partner for OEMs worldwide. In 2024, the Group achieved a consolidated revenue of 27 billion euros. FORVIA SE is listed on the Euronext Paris market under the FRVIA mnemonic code and is a component of the CAC SBT 1.5° indice. FORVIA aims to be a change maker committed to foreseeing and making the mobility transformation happen. [www.forvia.com](http://www.forvia.com)
