## **FORVIA UNVEILS THE ON-DEMAND CENTER CONSOLE: A MODULAR INTERIOR SYSTEM ELEVATING COMFORT, CUSTOMIZATION, AND SUSTAINABILITY**

**FORVIA introduces the On-demand center console, a furniture-inspired modular interior system designed to transform vehicle cabins into adaptable lifestyle spaces. Modules include coffee machines, refrigerators, tray tables & storage compartments, and even a retractable display for an immersive “theater mode.”**

This platform empowers users and OEMs to customize interiors with interchangeable modules, all without structural modifications. By enabling reuse and upgrades, the system supports sustainability goals while enhancing comfort and convenience.

At the heart of this breakthrough is FORVIA patented MoodPlug, a standardized, tool-free platform that seamlessly integrates mechanical and electrical connections, including signals, supporting power reception and data communication without design changes. It allows OEMs to develop tailored features across diverse vehicle segments efficiently.

*"By enabling users to tailor their vehicle environment and easily upgrade or replace modules, the On-demand center console not only enhances comfort but also reduces waste and extends interior component lifecycles. This innovation aligns perfectly with FORVIA's vision for adaptable, eco-conscious mobility,"* **said Frédéric Rabain, Vice President R&D at FORVIA Interiors.**

### **Engineering excellence meets lifestyle flexibility**

The On-demand center console is designed for durability, recyclability, and lightweight performance. Its tool-free, plug-and-play system lets users easily adapt interiors to match their mood. For OEMs, this modular design streamlines production and enables scalable solutions that evolve with customer needs. The system also remains compatible with

solutions such as SlimVent, a ventilation system, and radiant panels. The modularity and new features preserve the ventilation and heating functions provided by the radiant panels, ensuring climate comfort while maximizing interior flexibility.

### **A multi-purpose lifestyle center console**

Blending modular functionality with refined aesthetics, the On-demand center console features soft-touch surfaces, ambient lighting, and geometric forms that harmonize across vehicle interiors. The variety of modules allows flexibility and lets users tailor their cabin for comfort, work, or leisure, supporting upgrades both at purchase and after-sale.

### **Sustainability at its core**

Aligned with circular economy principles, the system promotes reuse and minimizes waste by enabling module upgrades or replacements without full system swaps. The universal base platform streamlines inventory and supports second-life applications. By balancing innovation with environmental responsibility, the On-demand center console helps OEMs deliver sustainable, long-lasting interiors.

#### **About FORVIA**

FORVIA, a global automotive technology supplier, comprises the complementary technology and industrial strengths of Faurecia and HELLA. With over 150,000 people, including more than 15,000 R&D engineers across 40+ countries, FORVIA provides a unique and comprehensive approach to the automotive challenges of today and tomorrow. Composed of 6 business groups and a strong IP portfolio of over 13,000 patents, FORVIA is focused on becoming the preferred innovation and integration partner for OEMs worldwide. In 2024, the Group achieved a consolidated revenue of 27 billion euros. FORVIA SE is listed on the Euronext Paris market under the FRVIA mnemonic code and is a component of the CAC SBT 1.5° indice. FORVIA aims to be a change maker committed to foreseeing and making the mobility transformation happen. [www.forvia.com](http://www.forvia.com)
